Direction for the question:

Four alternative summaries are given the text. Choose the option that best captures the essence of the text.

Q13. Some decisions will be fairly obvious-“no-brainers”. Your bank account is low, but you have a two week vacation coming up and you want to get away to some place warm to relax with your family. Will you accept your in-laws’ offer of free use of their Florida beachfront condo? Sure. You like your employer and feel ready to move forward in your career. Will you step in for your boss for three weeks while she attends a professional development course? Of course.

- A. Some decisions are obvious under certain circumstances. You may, for example, readily accept a relative’s offer of free holiday accommodation. Or step in for your boss when she is away.
- B. Some decisions are no-brainers. You need not think when making them. Examples are condo offer from in-laws’ and job offers from bosses when you bank account is low or boss is away.
- C. Easy decisions are called “no-brainer” because they do not require any cerebral activity. Example, such as accepting free holiday accommodation abounds in our lives.
- D. Accepting an offer from in-laws when you are short on funds and want a holiday is no-brainer. Another no-brainer is taking the boss’s job when she is away.

- a) A
- b) B
- c) C
- d) D

Q14. Physically, inertia is a feeling that you just can’t move; mentally, it is a sluggish mind. Even if you try to be sensitive, if your mind is sluggish, you just don’t feel anything intensely. You may even see a tragedy enacted in front of your eyes and not be able to respond meaningfully. You may see one person exploiting another, one group persecuting another, and not be able to get angry. Your energy is frozen. You are not deliberately refusing to act; you just don’t have the capacity.

- A. Inertia makes your body and mind sluggish. They become insensitive to tragedies, exploitation, and persecution because it freezes your energy and decapitates it.
- B. When you have inertia you don’t act although you see one person exploiting another or one group persecuting another. You don’t get angry because you are incapable.
- C. Inertia is of two types- physical and mental. Physical inertia restricts bodily movements. Mental inertia prevents response to events enacted in front of your eyes.
- D. Physical inertia stops your body from moving; mental inertia freezes your energy and stops your mind from responding meaningfully to events, even tragedies, in front of you.

- a) A
- b) B

- c) C
- d) D

Direction for the question:

Answer the question based on the following information. Indicate which of the statements given with that particular question consistent with the description of unreasonable man in the passage below.

Unreasonableness is a tendency to do socially permissible things at the wrong time. The unreasonable man is the sort of person who comes to confide in you when you are busy. He serenades his beloved when she is sill. He asks a man who has just lost money by paying a bill for a friend to pay a bill for him. He invites a friend to go for a ride just after the friend has finished a long car trip. He is eager to offer services which are not wanted, but which cannot be politely refused. If he is present at arbitration, he stirs up dissension between the two parties, who were really anxious to agree. Such is the unreasonable man.

Direction for the question:

In view of the passage given below. Choose the best option for question.

When talks come to how India has done for itself in 50 years of Independence, the world has nothing but praise for our success in remaining a democracy. On other fronts, the applause is less loud. In absolute terms, India has not done too badly, of course, life expectancy has increased. So has literacy. Industry, which was barely a fledgling, has grown tremendously. And as far as agriculture is concerned, India has been transformed from a country perpetually on the edge of starvation into a success story held up for others to emulate. But these are competitive times when change is rapid, and to walk slowly when the rest of the world is running is almost as bad as standing still on walking backwards.

Compared with large chunks of what was then the developing world South Korea, Singapore, Malaysia, Thailand, Indonesia, China and what was till lately a separate Hong Kong-India has fared abysmally. It began with a far better infrastructure than most of these countries had. It suffered hardly or not at all during the Second World War. It had advantages like an English speaking elite, quality scientific manpower (including a Nobel laureate and others who could be ranked among the world's best) and excellent business acumen. Yet, today, when countries are ranked according to their global competitiveness, it is tiny Singapore that figures at the top. Hong Kong is an export powerhouse. So is Taiwan. If a symbol were needed of how far we have fallen back, note that while Korean Cielos are sold in India, no one in South Korea is rushing to buy an Indian car.

The reasons list themselves. Topmost is economic isolationism.

The government discouraged imports and encouraged self-sufficiency. Whatever the aim was, the result was the creation of a totally inefficient industry that failed to keep pace with global trends and, therefore, became absolutely uncompetitive. Only when the trade gates were opened a little did this become apparent. The years since then have been spent in merely trying to catch up. That the government actually sheltered its industrialists from foreign competition is a little strange. For in all other respects, it operated under the conviction that businessmen were little more than crooks how were to be prevented from entering the most important areas of the economy, how were to be hamstrung in as many ways as possible, how were to be tolerated in the same way as an inexcisable wart. The high expropriatory rates taxation, the licensing laws, the reservation of whole swathes of industry for the public sector, and the granting of monopolies to the public sector firms were the principle manifestations of this attitude. The government forgot that before wealth could be distributed, it had to be created.

The government forgot that it itself could not create, but only squander wealth. Some of the manifestations of the old attitude have changed. Tax rates have fallen. Licensing has been all but abolished. And the gates of global trade have been opened wide. But most of these changes were first by circumstances partly by the foreign exchange bankruptcy of 1991 and the recognition that the government could no longer muster the funds of support the public sector, leave alone expand it. Whether the attitude of the government itself, or that of more than handful of ministers, has changed, is open to question. In many other ways, however, the government has not changed one with. Business still has to negotiate a welter of negotiations. Transparency is still a longer way off. And there is no exit policy. In defending the existing policy, politicians betray an inability to see beyond their noses. A no-exit policy for labour is equivalent to a no-entry policy for new business. If one industry is not allowed to retrench labour, other industries will think a hundred times before employing new labour. In other ways too, the government hurts industries.

Public sector monopolies like the department of telecommunications and Videsh Sanchar Nigam Ltd. make it possible for Indian business to operate only at a cost several times that of their counterparts abroad. The infrastructure is in a shambles partly because it is unable to formulate a sufficiently remunerative policy for private business, and partly because it does not have the stomach to change market rates for services. After a burst of activity in the early nineties, the government is dragging its feet. At the rate it is going, it will be another fifty years before the government realises that a pro-business policy is the best pro-people policy. By then of course, the world would have moved even farther ahead.

Direction for the question: Read the following information and chose the best option.

Recently, the answers of a test held nationwide were leaked to a group of unscrupulous people. The investigative agency has arrested the mastermind and nine other people A, B, C, D, E, F, G, H and I in this matter. Interrogating them, the following facts have been obtained regarding their operation. Initially, the mastermind obtains the correct answer-key. All the others create their answer-key from one or two people who already possess the same. These people are called his/her “sources”. If the person has two sources, then he/she compares the answer-keys obtained for both sources. If the key to a question from both sources is identical, it is copied, otherwise it is left blank. If the person has only one source, he/she copies the source’s answer into his/her copy. Finally, each person compulsorily replaces one of the answers (not a blank one) with a wrong answer in his/her answer key.

The paper contained 200 questions; so the investigative agency has ruled out the possibility of two or more of them introducing wrong answers to the same question. The investigative agency has a copy of the correct answer key and has tabulated the following data. This data represents question numbers.

NAME WRONG ANSWER(S) BLANK ANSWER(S)

- A 46 —
- B 96 46,90,25
- C 27,56 17,46,90
- D 17 —
- E 46,90 —
- F 14,46 92,90
